SAVE THE BABIES! BUTCHER CASHED BAD CHECKS

They Die in New York at the Rate of Ninety a Day.

Terrible Infant Mortality Here During Last Week.

The Free Doctors Are Doing Their Best for the Tots.

The Subscriptions.

Previously acknowledged \$10,000.00
VICTORIA, B.C., July 12.—The infant mortality here during the week ending July 10th was 99. The following are the names of the children who died: (List of names follows in columns.)

Those people who write letters to the newspapers, pleading for the lives of the children, should not forget the babies. The death rate is going up, and the children of the poor are going down to untimely graves. Last week the city's mortality reached 99, an increase of sixty-two compared with the week of the corresponding week of 1893.

As during the past two weeks, the greatest mortality was due to diarrhoeal troubles, which sacrificed 27 babies. The total loss of child life during the week ending July 10th was 99.

The fatal trouble with the children is neglect. What they need is care—a few ounces of good food suitable to their constitutions, a couple of baths, a couple of hours of sleep during the day, and a place to sleep, given those conditions daily for a few years, the average child may be expected to live to old age.

At the same time the tenement-house population has increased over one hundred thousand this year, while there has been a decrease in the death-rate from 22.5 to 22. The decrease in infant mortality under five years of age is also marked and significant.

No doubt the decreased death-rate is due, in a great measure, to the improvement in the water supply through the measures of purification adopted, and to the good work of the Board of Health among the tenement-houses. "The Evening World" may justly claim that the decrease in the deaths of infants is, in a very great degree, due to the excellent work of the faithful doctors of the Sick Babies' Fund, which this year has already given above the ten-thousand-dollar mark.

NOW FOR THE ATHLETES.

Considerable interest is manifested in the approaching athletic contest between the Oxford and Yale teams next Monday. The attendance will be large and it will be what the English call "well." The Prince and Princess of Wales are expected to be there, with a number of the other Princes of the blood Royal. Many of the State family are expected to be present, including Ambassador Bayard and family, Congressman Collins, ex-Secretary of Legation White, and many money kings as Astor, Vanderbilt and Gould.

Yale boys have been insisting on a climb path for the hurdle race, but the Englishmen objected to the suggestion. The Englishmen have been insisting on a climb path for the hurdle race, but the Englishmen objected to the suggestion.

The legal proceedings against Debs were summary enough to teach him that he was not a Pacific Railroad magnate nor a Sugar Trust millionaire.

The Knights of Labor will not succeed in impeaching Olney. But Olney has impeached the United States laws. He has said they can't touch the Trusts.

Vigilant has been outdressed but not outwaded. All that she needs is water to move on and wind to move with. She was not designed for racing up a creek in a calm.

Gotham is gradually taking a leading place in health reform. Give us a little more tenement-house reform and turn the garbage, and the city will make even a better showing.

Woman gets a certificate of reasonable doubt. How Croker must envy him. Such a certificate as to where he got all his wealth, would be an invaluable possession to the ex-boss of Tammany.

The Massachusetts Supreme Court has decided that Bay State laws are enough to knock out the Sugar Trust in that Commonwealth. United States Attorney-General Olney should borrow a leaf from the statute book of his own State.

Three millions of dollars of property burned in Chicago by rioters is reduced by later estimates to the more modest sum of \$16,000, and even this latter looks like a deceptive round number. It is just as well not to make things out worse than they are.

The most deplorable occurrence yesterday was the wrecking of a train with Federal troops on board, near Sacramento. A long double train, over a trestle about two miles from the Sacramento River bridge, fell with the train into fifteen feet of water, killing the engineer and three privates of Battery L, U. S. A., and wounding four others. The strings of the trestle had been sawed twenty-two, some spikes removed and many spikes driven in, and the trestle positively deny that this was their work. One man evidently connected with the outrage is under arrest.

"We started to get that pond cleaned when I came into the Board, four years ago," said Commissioner Straus at yesterday's meeting of the Park Board, "and we have been at it ever since. I want to see the work finished before I go out of office." It was the Fifty-ninth street pond in Central Park to which he referred. It is well understood that good things come to him slowly in the park where else. And one thing that promises to be slower even than the cleaning of the Fifty-ninth street pond is the giving out of a clear and sufficient explanation concerning that \$100,000 fund which was appropriated to improve the park and furnish work for worthy unemployed men.

THE OUTLOOK.

The railroad people assert that the strike is over; that railroad business is resuming its normal condition, and that "the companies are handling all the business that is offered them and handling it promptly and with no inconvenience to the public." At least so says Chairman Egan, the General Managers' Association, at Chicago.

On the other hand, the labor leaders insist that the situation is unchanged, and that "the railroads are moving no freight and very few passenger trains."

The truth lies between these two statements. The roads are making some progress in moving trains, and everything looks favorable for the maintenance of law and order. But much remains to be done before the railroad traffic of the country is fully restored.

The most gratifying events of yesterday are the failure of the general strike expected in all trades and in all quarters, and the improved outlook in California. The good sense of the workingmen who have no immediate grievances of their own to correct in recognizing the folly of going into voluntary idleness at this time is a gratifying sign. The danger in California of any serious consequences is over.

Another attempt by Mayor Phelan, of Detroit, backed by the Mayors of fifty Western cities, to induce the Pullman Company to arbitrate was met yesterday by the stereotyped stubborn refusal: "There is nothing to arbitrate."

As law and order are restored the position of the Pullman corporation grows more offensive to public sentiment.

On the whole, the events of the last twenty-four hours have been promising.

THE PUBLIC HEALTH.

The report of the Sanitary Superintendent to President Wilson, of the Board of Health, shows that the health of New York is in a very satisfactory condition. While the population of the city has increased probably sixty-five thousand since last year, the deaths, the year ending the first of June, are between two and three thousand less than during the corresponding period of 1893.

At the same time the tenement-house population has increased over one hundred thousand this year, while there has been a decrease in the death-rate from 22.5 to 22. The decrease in infant mortality under five years of age is also marked and significant.

No doubt the decreased death-rate is due, in a great measure, to the improvement in the water supply through the measures of purification adopted, and to the good work of the Board of Health among the tenement-houses.
